SUMMARY

Full-stack and AI engineer with 7+ years of hands-on development (professionally since 2021) across startups, research labs and enterprises. Currently Lead Developer at Trafasa Ltd, managing the development team and building AI-first B2B trade and procurement platforms used by ~2,000 customers.

Strengths: Python, JavaScript/TypeScript, React/Next.js, on-prem LLMs and AI agents, RAG with hybrid search, data pipelines, and taking products from requirements to production.

EXPERIENCE

Lead Developer — Trafasa Ltd Dec 2025 – Present

- Manage the development team and own delivery of AI-first B2B trade platform Trafasa.ai and procurement SaaS Proquro.ai for ~2,000 customers, improving key workflows by ~40%.
- Shipped a customer-facing AI agent for supplier queries and dispute triage, running Llama 3.2 (3B/7B) on-prem via Ollama.
- Built configurable per-customer workflows plus background workers and queues for large-scale requirement handling.
- Stack: Frappe (Python), Next.js/React, PostgreSQL, CI/CD, monitoring, RBAC.

Freelance Developer — Fineax LLC Sep 2021 – Nov 2025

- Built a Python/PyDicom pipeline anonymising MRI and CT data across manufacturers, scrubbing 15+ identifying fields while keeping UIDs consistent.
- Automated ingestion-to-S3 batch processing (Boto3) with checksum validation, cutting manual effort by 95%.

Research Assistant — Dublin City University, Ireland Mar 2023 – Jul 2025

- Built a Unity VR classroom simulation for education research with Dr. Enda Donlon and Dr. Peter Tiernan.
- Developed a Flask backend (40+ REST endpoints) capturing location, image, audio and interaction data, plus a heatmap analytics dashboard.

Software Developer — Softech ERP Solutions Pvt Ltd, India Jan 2021 – Aug 2021

- Sole developer of an ERP (Core PHP, MySQL) for Intime Ltd, serving 500+ employees nationwide.
- Optimised schemas for 20GB+ of weekly transactions and automated data entry, saving ~200 staff hours per week.

Internships & Early Projects — India 2018 – 2020

- **Ashvau (formerly Repairbuck), Full-Stack Intern:** real-time online inauguration system (NuxtJS, MongoDB) for 220+ global users; Ruby on Rails + PostgreSQL repair app that reached 150+ users in 4 months.
- **Softech ERP Solutions, Database Intern:** PL/SQL data migration and query optimisation; earned a return offer for the Intime Ltd ERP project.
- **CARL, SRM — Product Manager & Error Analyst (2020–2021):** delivered Google AI | Explore ML workshops to 100+ participants (Certificate of Appreciation from Google AI); mentored junior members across 10+ projects.

EDUCATION

M.Sc. Data Analytics — Dublin City University, Ireland Aug 2021 – Aug 2023

- Thesis: Financial Narrative Summarisation (summarising fintech documents with NLP).

B.Tech. Computer Science — SRM Institute of Science and Technology, Chennai Jul 2016 – May 2020

- Thesis: Cloud Hack Detection System using Machine Learning.

SKILLS

Languages	Python, JavaScript, TypeScript, Java, PHP, C++, SQL
Frameworks	React, Next.js, Node.js, Flask, Frappe/ERPNext, NuxtJS, Ruby on Rails, Unity VR
AI / LLM	LLM apps, RAG with hybrid search, vector databases, AI agents, LangChain, Ollama, Llama 3.2, transformer models, machine learning
Data	PostgreSQL, MySQL, MongoDB, Oracle PL/SQL, data pipelines, REST APIs
Cloud & DevOps	AWS (S3, Boto3), Kubernetes, ArgoCD, Jenkins, Camunda, CI/CD
Domains	B2B trade & procurement, ERP, fintech documents, medical imaging (DICOM), VR research

PROJECTS

- **Game Engine:** custom 2D/3D game engine prototype.
- **HadoopDCU:** big data processing with the Hadoop ecosystem.
- 20+ further repositories in automation, data visualisation and frameworks — zelone.github.io/repositories.html
